

OFFER FOR DISTRICT HEATING COMPANIES

ZUK STĄPORKÓW S.A. has more than 50 years of experience manufacturing machinery and equipment for European power plants, combined heat and power plants and heat plants, as well as producing plants generating energy for own needs of fruit and vegetable processing plants, sugar factories, breweries, steel mills, mines and brickyards and other entities.

We specialise in the production of conveyors, slag removers, grates, as well as subassemblies and spare parts for the above machines and devices.

SERVICES

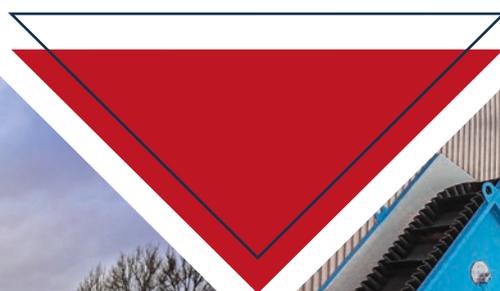

In addition to the production of equipment and spare parts for district heating companies, we also provide a number of services for heat generation equipment and installations at our clients' plants and facilities.

We offer:

- service (warranty and post-warranty)
- overhauls
- inspections
- expert opinions
- modernisations

Our service technicians have specialist knowledge in adjusting and repairing heating devices, as well as in servicing and repairing grates and conveyors. They provide assistance and technical support to ensure the proper operation of the equipment.

ZUK Stąporków S.A. also carries out inspections of heating equipment and provides parts replacement services.

SPARE PARTS

Optimal stock levels allow us to deliver quickly and flexibly.

Our offer includes components and spare parts for:

grates:

- hoods
- coal baskets
- chains
- grate drives: BNR2000, NBp500, NBp 250
- pipes and spacer bars
- fire bars
- furnace roofs
- pullers
- retainers
- scraping devices
- seals
- rollers
- shafts

conveyors

(push-plate and worm conveyors):

- sliding plates
- float chambers
- chains
- bearings
- drives
- guide rollers
- worms
- replaceable slides
- scraper belts
- shafts
- tanks
- basalt flooring
- locks
- scrapers

For custom-made parts, we complete orders based on the documentation provided by the ordering party or using our own design created by a team of experienced design and production engineers.

Each element manufactured by our company is checked to ensure not only its durability but also resistance to mechanical damage. In production, the spare parts are machined with the highest accuracy using state-of-the-art CNC machinery.

MECHANICAL GRATES

ZUK Stąporków S.A. is a manufacturer of grates intended for fine coal furnaces, as well as plants and woods biomass furnaces.

We offer the following grates:
